- AWS
- Kubernetes
- Terraform
- CI/CD (GitHub Actions)
- Prometheus & Grafana
- Docker
- Linux
- Incident response

experience

DevOps Engineer

CloudLedger

2019 — Present

- Moved 60 services to Kubernetes with Terraform, taking deploys from weekly to 40 a day.
- Cut AWS spend by 34% (\$410k a year) with rightsizing, spot instances and storage lifecycle rules.
- Raised uptime from 99.5% to 99.95% by adding health checks, autoscaling and runbooks.
- Built a CI pipeline that runs 3,000 tests in 7 minutes, down from 28.
- Led on-call rotation for 12 engineers and halved mean time to recovery.

education

- BSc Computer Science 2018**
- AWS Solutions Architect**
